acelleron®
A health and wellness company

Thank you for your interest in working with Acelleron. We are a health and wellness company, providing innovative solutions to families, employers, and health care providers through quality education, support, and products.

Specifically, Acelleron can supply nebulizers direct to your facility, so patients can start aerosol treatments without having to wait for their prescription to be filled. You will have peace of mind knowing your patient leaves the office with a nebulizer. We believe our service reduces emergency room visits for your patients as well as after-hour calls to your facility. This increases patient compliance as well as continuum of care.

We typically provide six Drive nebulizer compressor kits at a time, at no cost to your facility. When you have a patient that needs the equipment, you would simply fill out and fax the paperwork in the box (including the patient visit notes supporting medical necessity) and we bill the patient's health insurance plan for the purchase. We have been providing this service throughout New England since 2004 and would be happy to connect you to some of our existing referral sources.

In addition, Acelleron provides breast pumps, maternity belts, maternity compression socks, and blood pressure monitors covered under health insurance and Medicaid plans along with a host of mom and baby products to purchase out of pocket.

As an accredited home medical equipment supplier through Community Health Accreditation Partner ("CHAP"), we are committed to transforming the customer experience by applying our expertise in health insurance, medical equipment, wellness services, and technology. This customer dedication allows us to deliver the highest standards of care, resulting in long-standing relationships with over 2,000 pediatric centers, physicians, children's hospitals, and OB/GYN practices.

We look forward to the opportunity to work with your facility. To ensure the best possible service, we provide a dedicated account manager and an online provider portal (acelleron.com/providerportal) where you can access dispensing workflows, reference sheets, blank forms, FAQs, and order more nebulizers. On the back side of this page, we provide contact information, account manager information, and operations department contact information.

Best Regards,

The Respiratory Division of Acelleron

Respiratory Department Information:
